

**LIST OF CAMPUS CLIMATE CORPS PROJECTS**

TITLE	DESCRIPTION
<b>Management</b>	<b>Management of the overall project team</b> Handle general project management and coordination. Coordinating communications and activities of the Campus Climate Corps team will be a major challenge.
<b>Curriculum</b>	<b>Development and distribution of educational curriculum packages for university professors</b> Reach more students by enlisting the help of professors by providing them content for their courses related to climate change and natural resource management. Our team will analyze course curricula and send professors supplemental content that will draw attention to the COP/COY conference, Campus Climate Corps, and the related student events.
<b>Teach-In</b>	<b>Design and planning of the educational programs for the pre-conference rallies and events</b> Create the itineraries, the speeches, the places for people to assemble, and people to see and to talk to. We will also strive to develop an actual seminar or symposium for the students.
<b>Carbon</b>	<b>Creation, analysis, and implementation of the carbon offset projects so students traveling to COP/COY have zero footprint</b> Estimate the carbon footprint for each traveler, to find and/or create, develop and set up projects to achieve the required carbon offset for each COP/COY events participant.
<b>Policy</b>	<b>Analysis of national climate change policy</b> Document climate change mitigation actions/policies of each nation and their positions relative to the COP/COY conference agreement. Determine which nations are falling short in their commitments and develop a set of advocacy positions designed to move these nations towards a better, more aggressive posture on climate change.
<b>InfoTech</b>	<b>Design and create the project IT systems and Web pages</b> Develop useful IT systems, databases, and Web pages for the event and organizing effort.
<b>Marketing</b>	<b>Marketing of the student events to be held in COP/COY</b> Promote the events in COP/COY all around United States and other countries; develop actions on Internet before the events.
<b>Media</b>	<b>Creation and implementation of the media campaign</b> Develop relations with the media (newspaper, radio, television, bloggers, etc.), create and update social networks accounts.
<b>Relations</b>	<b>Management of the relations with embassies and governments</b> Handle relations with participating governments and their embassies for possible events at these location coordinated with those governments and local authorities.
<b>Tourism</b>	<b>Planning tourism activities in the COP/COY city</b> Plan and coordinate various activities for American students during their stay in the COY/COP city, organize tours during weekends.
<b>Finance</b>	<b>Finance and management of the overall event</b> Handle the event and planning budget, collect funds (Websites, special events, donations, DBA, Trademark, crowd sourcing...), to ensure project solvency and success.
<b>Recruiting</b>	<b>Recruitment of American students for the events and rallies</b> Enlist U.S. student organizations and individuals at American campuses. This includes visiting campuses and setting up tables, meeting with student groups, etc. This project could involve travel across the state of Florida and throughout the nation. It will require students with sufficient financial resources to undertake these trips.
<b>Communications</b>	<b>Communication with the national and American populations so as to make them aware of the event and its importance</b> Reach out to non-student organizations and populations for their support in the project and event.
<b>Health</b>	<b>Planning of health needs, for both American students and during the events</b> Coordinate health insurance policies and contingency plans for the American students, to make sure that all the participants have access to a medical assistance during their trip abroad to COP/COY.
<b>Graphics</b>	<b>Creation of the design of the organization and events, for posters, website...</b> Design and produce attractive posters, logos, banners, Web pages, T-shirts, clothes and accessories for the events.
<b>Legal</b>	<b>Study of national contracts, public and private rights, liability issues, and establish activities limits based on local laws and regulations</b> Study and document to our team and participants the different laws to be respected the preparations for and implementation of the events.
<b>Security</b>	<b>Safety and security issues monitoring and actions</b> Advise the team on security issues associated with the event and conduct risk assessments. Coordinate with law enforcement agencies throughout the planning and implementation process.
<b>Nuclear Energy</b>	<b>Assess nuclear energy technology and policies</b> Review US, national and global experience with nuclear power and assemble educational program and policy positions for integration into events.
<b>Energy Technologies</b>	<b>Assess energy productions technologies and policies</b> Review energy production and use technologies and assemble educational programs and policy statements.
